

```

#include<iostream>
using namespace std;
class average
{
    private:
        int a,b,c,res;
    public:
        void read()
        {
            cout<<"Enter the three numbers :";
            cin>>a>>b>>c;
        }
        void avg()
        {
            res=(a+b+c)/3;
            cout<<"\n Average of:"<<a<<" "<<b<<" and "<<c<<" is "<<res;
        }
};
int main()
{
    average x;
    x.read();
    x.avg();
    return 0;
}

```
