

```
#include<iostream>

using namespace std;

class encap
{
    int no;
    string name;
    public:
        int display(int a, string b)
        {
            no=a;
            name=b;
            cout<<"No is "<<no<<endl;
            cout<<"name is "<<name<<endl;
        }
};

int main()
{
    encap e;
    e.display(2,"piyu");
}
```
