

```
#include<iostream>

using namespace std;

int main(){

    int var;

    int *ptr;

    int **pptr;

    var=300;

    ptr=&var;

    pptr=&ptr;

    cout<<"\nThe value of var is "<<var;

    cout<<"\nThe value of *ptr is "<<*ptr;

    cout<<"\nThe value of **pptr is "<<**pptr;

    return 0;

}
```
